

Becoming Pregnant. Overcome Infertility.

[Home](#) | [Order](#) | [FAQ](#) | [Contact](#)

Not Being Able to Have a Baby is Heartbreaking. You Know Deep in Your Heart That it is Not Fair. You Know You Would Make The Best Mother in the World.

If Only You Could Have the Chance...

Discover the principles to becoming pregnant naturally from women who succeeded despite long years of trying even after failing many medical tests and procedures regarding their inability to conceive.

Baby Dylan, a little Miracle for Leanne and Daryl after applying my techniques.

Dear Friends

My name is Dr Irina Webster. I am a medical doctor and also the director of Women Health Issues Program an international educational company for women. I am also the author of many books regarding overcoming infertility, becoming pregnant and women's health.

You have arrived here because you are looking for answers right! Well, the answers you seek are here. So let me tell you right now: if you still ovulate, then you can have a baby, no doubt about it.

Let me explain...

More than ten years ago I started my career as a doctor in a Women's and Children's Hospital – it was there that I started my research on infertility and I have continued to do so throughout my working years. Over this time I followed up with many couples who got pregnant naturally despite failing medical tests and procedures. And according to doctors they should be infertile, but they were not.

Here is Trish, a 43 years old woman:

Dear Dr Irina and your colleagues!

Thank you very much for helping us in our endeavors to have a baby naturally. The first and most important thing is that I am pregnant and the baby is due soon (very soon). I didn't want to write anything until the pregnancy ends but now I just want to hear your encouraging words before the delivery.

I have never done it before so feel apprehensive about the labor. I heard that it could be difficult after 40. Please, encourage me to be brave as you did before I fell pregnant. I know that everything will be OK, I have just been waiting for this moment for so long that it even feels unreal.

You know, I didn't think initially you could help me, because so many doctors couldn't. I even bought your book only because I put your name on Google and it showed me so many sites about you. So, I thought you must be something different and then I bought your book.

I liked your methodology on how to fall pregnant and started to follow it. And now I have all the consequences inside my big belly.

Write me back soon, as I want to hear from you again before I have to rush to hospital. Thank you so much.

Trish from small town in North Dakota, US

I have been keeping personal records regarding different aspects on infertility problems women were having and how many became pregnant after using natural methods. My notes go back 9 years and I have discovered many things along the way:

I would now like to share them with you.

But first I want to tell you the good news that many women who are considered to be infertile are not infertile at all. Most of them have a specific reason why they couldn't become pregnant. In many cases these reasons can be overcome and a healthy pregnancy achieved naturally (like what happened to the people I based my book on).

Dr Irina

The reasons for not becoming pregnant could be many: from not having enough intercourse at the correct time to having problems like endometriosis or PCOS.

But I can reassure you that any woman who still has eggs released by her ovaries is not infertile and can have a healthy baby. It doesn't matter how old she is or what she was told by her doctors, if she still ovulates then she can fall pregnant.

Another example:

Dear Dr Irina.

I am a long time sufferer from PCOS. I was actually first diagnosed when I was 13 years old. I was told from a very young age that my ability to have kids was very limited and most likely I would never have one.

Actually, I accepted my infertility at first but when I got married to Jason I changed my mind (because of him) and started my search for an answer. I was 39 at that time.

It was Jason who got your book from the Internet and started reading it at first and told me what to do and I just followed.

So, we got the reward for all our effort.

My little darling Jenny is sleeping now in Jason's arms. He is walking around the room and rocking her - he does it all the time to make Jenny sleep after a feed.

I am really happy now, more happy than I ever been.

Sometimes I think what could have happened if Jason didn't buy your 1st book at that time and didn't encourage me to do the right things according to your book - I probably would still consider myself completely infertile and spend my life focusing on coping with consequences of PCOS instead of experiencing joy and happiness with my baby.

I believe if I could overcome infertility (with my "absolutely hopeless" case) - anyone can overcome infertility as well.

Thanks deeply.

With all our love.

Ann, Jason and Jenny. CA

A happy Jason with Baby

Once I was speaking at a seminar and a lady asked me a question. She was told by a doctor that she could never fall pregnant because of her long history of trying and failing even though she was still ovulating. My answer was: "Don't believe those doctors who tell you "You can't" because if you are still ovulating then there are no reasons for you to stop trying new methods".

You know that most doctors are very conservative people by their nature and try to

keep on the safe side (scared to overestimate their diagnoses). It is much better to accept when an infertile woman suddenly falls pregnant later that it was a miracle, than promise her she will become pregnant, just in case she does not.

Many natural fertility strategies are not recognized by many medical doctors simply because these strategies will not make them any money. Doctor's get paid for doing what they do: giving out drugs and performing surgical procedures. It is what they have been trained to do for many many years and they were not trained in natural methods.

So, it is understandable why they offer you fertility drugs, then IVF and Intrauterine insemination, Intracytoplasmic Sperm Injection, Zygote Intrafallopian Transfer and the like, it is all they know. Their recommendations are good for the patient who tries it and finally falls pregnant, but for many thousands of women who do not succeed with these sophisticated invasive treatments it is just too bad.

So what do these women have to do?

Keep repeating it all over again and go through the pain and anxiety once more?

And what about the women who don't want to use these invasive treatments? Just forget the dream of having a baby? **No certainly not:** So what is the answer? The answer is – never give up on your dream of having a baby. Try other methods to fall pregnant, especially the non-invasive ones. Those which will not give you any side effects or pain.

Read a testimonial from Jane and Nathan about their experiences:

Hi Irina

Finally, I proved to myself and all family that I can be a mom after 12 infertile years,

Now we have a baby-Girl (Alice) who is wonderful and just a miracle.

I am happy that I could finally overcome the barrier I had which was holding me back but now I feel like a winner!

Every time she smiles at me and touches my face with her little hands I cry. I cry from happiness and joy. I want everyone to experience these feelings in their lifetime at least once. It gives you a sense that you are really living and makes you appreciate every moment of your life.

Now I understand that all these years of waiting for a baby were not just useless times and

Jane and Nathan with their miracle

not simply a struggle - it was a time of mental and physical preparation for the greatest joy and happiness of my life.

Your book Irina, changed my life to the absolute best and gave me new meaning for my existence in this world. Being a mom is the most wonderful experience I've ever had. And I wish that every woman could experience the same joy and happiness.

**Thank you very much, Irina.
From our hearts and souls.
Jane and Nathan**

But I agree, sometimes giving up seems easier than making a dream come true because the emotional pressure of former failures to conceive, put you down every time you think of them.

What I would recommend you to do every time you start to get these negative feelings, is to think to yourself that you already have a baby. Imagine how excited you are about nursing your baby in your arms, giving him/her a bath, changing your baby's little clothes or proudly going for a nice walk holding your little darling or pushing a new fancy pram.

Imagine talking to your baby and singing a little song to amuse him/her and getting that happy smile back and a little giggle "Aa-uu, aa-uu" . Imagine bending forward to kiss your babies cheek and little hands reach up exploring your face, you kiss them and get a big giggle back.

Think about the precious moments you will share with your baby and it will inspire you to strive forward to your goal.

And there are many precious moments you will share with your baby but the most precious of all is the intimate time you spend feeding him/her. Can you imagine the joy you will have when the baby first starts to nuzzle into your breast. You help by moving your nipple close to its little mouth until it finds it and starts to suckle? The pure joy as you watch her feeding, sucking furiously at first before settling down to an even pace, before falling asleep still gently holding your nipple in its little mouth. But sometimes your baby will want to play with you during the feed, hugging your breast with her free hand, lifting her leg so her foot nearly touches your face and you kiss her little toes until she gives a little giggle.

These are beautiful, intimate moments. And think of them instead of focusing on your previous experiences.

Old knowledge and old experiences are good but they only resulted in what you have now. When you get new knowledge and new experiences and combine it with your old ones –you definitely will get a new result.

That is why learning new fertility methods are important for a woman who is trying to conceive. And any new methods could be crucial for you as they can result in the most precious gift of life – a new beautiful baby.

My New Book

In my latest book I described little known methods for becoming pregnant naturally that have been ignored by most medical professionals (many doctors may not have even heard of them, because they are too busy focusing on drugs and surgical treatment).

But in reality, these natural methods work well on most women. Plus they are harmless and have no side effects.

Here is another testimonials from people who succeeded:

Dear Dr Irina

Well! The methods you described in your book definitely helped me on my way to having a baby. I fell pregnant and my due date is soon. It has taken me 6 years to get here and I am so excited. My doctor says it is a good progressing pregnancy.

But I thought it would never happen because of one of my tube were blocked. I had a bad accident many years ago which damage my abdomen badly.

You taught me the method to become pregnant and keep the pregnancy and I did everything that you told me to do and now I am so happy I did.

I am really glad I had that consultation with you, you explained everything I needed to do and you give me hope just when I really needed it.

Your sincerely, with a lot of appreciation.

Veronica. E. TX.

Hi Doctor

I just could not wait to tell you this, at last it looks like we have succeeded with conception. I have been trying to have a baby for nearly 10 years. I failed 6 IVF's and I think it's all because of my PCOS .

The last IVF treatment was really different from the many treatments I had before. My pregnancy is 29 weeks now and I feel kicking and moving inside my belly all the time. I had an ultrasound test done yesterday and doctor said it is a girl and everything is going well.

I really love when my girl moves inside me - it means she is all right and healthy. I talk to her and sing songs as you told me to do for better brain development of the baby.

You see now, how old knowledge and old experiences are good but when you get new knowledge and new experiences and combine it with your old ones –you definitely will get a new result.

In my new book I described new methods for becoming pregnant naturally. I teach you how you can increase your chances a hundred fold and all in the privacy of your own home: no invasive methods here.

Very few of my colleagues (doctors or Gynecologists) recommend these methods to induce and increase fertility in women. But I have introduced these to many women who seem to have tried everything and failed to conceive before. After implementing these methods 78% of infertile women conceive and have a baby.

Here are some warm letters people sent to us :

Dear Dr Irina.

Fantastic! I was skeptical when I bought your book. I had tried many so called methods to have a baby in the past and nothing worked so I wasn't expecting any any miracles.

Baby Sharon

However, within just a few months I fell pregnant and my baby is 3 months old now.

I thought that with the problems my husband had we would never have a baby but I don't think like this anymore.

On the contrary I am planning for a second child now and really believe we will have one. I believe that if a miracle happens once they can happen twice.

It is like the law of attraction - miracles attract other miracles.

**Thanks Again
Elizabeth Gordon, UK**

Hi Irina

I just want to thank you for all your help in the past. As you know I had three miscarriages in the past.

If it was not for your understanding and knowledge and the methodology you told us about we would not have Anna.

Now I have realized what I did wrong trying to conceive before. I will not make these mistakes again when I decide to have my second child.

Anna is 6 years old now and a very happy child. I would recommend to anyone to read your books because I know that people will have great success with the information you give them: after all we did!

Thanks Again
Elena and Alexy. RU.

I really encourage you to try these methods I described in my new book because I really believe they can help you and really show you something important you didn't know before.

My latest book "Increase Your Fertility Naturally" will show you how to fall pregnant using the power of natural methods that most medical professional greatly underestimate or simply don't know about. These methods achieve a 78% success rate in overcoming infertility according to our 9 years of research.

We also included here my first book "You Can Overcome Infertility" which will tell you about all the infertility treatments used by modern doctors. You will learn in which situation what treatment is more appropriate for you, why the treatments fail sometimes and what kind alternatives exist, plus learn how to increase your chances using these methods.

Here are 12 Compelling Reasons for You To Read these books:

1. Because you will learn the how to fall pregnant methods you can use yourself at home, which work naturally without any side effects, pain or discomfort.
2. Because you will discover the strategies of becoming pregnant from women who have had medical problems but succeeded in having a baby despite all of their problems.
3. Because we don't just giving you a kind of "secret to falling pregnant". We show you that for different situations there are specific ways to fall pregnant. So you will have a chance to find your own ways and methods for becoming pregnant.

4. Because you will be shown how to fall pregnant in case of **unexplained infertility** in older women and know the exact time for you to try to become pregnant.
5. Because after reading these books you will avoid going under general or local anesthetic to perform surgical procedures like IVF, Intracytoplasmic Sperm Injection, Zygote Intrafallopian Transfer and the like.
6. Because you will avoid all the complications related to these highly invasive procedures.
7. Because you will be able to live a more harmonious life as a woman, as a wife and as a mother using the energy of your own cycles. You learn to use the cycle's energy instead of letting this energy dominate you.
8. You'll learn what makes some women fall pregnant and have a baby easier than others although both have the same medical problems.
9. You'll learn the first things you **MUST** do before you start on your way to getting pregnant, overcoming infertility and having a baby.
10. You'll learn why doing things incorrectly can stop you from having a baby and how to avoid them.
11. Because you will learn what does it mean by "old" sperm and "old" egg and how they can affect your fertility cycles. (These things have nothing to do with your biological age or the age of your partner).
12. Because you'll discover there are proper ways to conceive, hence avoiding miscarriage and increase your chances of full term pregnancy.

The 12th reason is very important for people who are trying to conceive again after the disappointment of a miscarriage. You can stop miscarriages from happening just by using the special methods which I describe in my book. They are easy to understand and implement.

In many cases miscarriage can be prevented, people just don't know how. Here is a very special testimonial from a couple who had three miscarriages until they actually succeeded with a healthy pregnancy.

Dear Dr Irina,

Thank you so much for your help and support at the time we really needed it.

When Alice miscarried after 7 years of trying to fall pregnant, all the family felt devastated. Then she had a few more miscarriages, so we thought we will never have a child together.

Although Alice had a son from previous relationship and we get on very well together, I was struggling to accept that I may never have my own child. Alice didn't like the situation either.

Luckily, we found you and your books which gave us new hope straight after reading them. We followed your instructions precisely for a few months and to our happiness Alice fell pregnant again and this pregnancy was just perfect. She gave birth to our son Michael on 14 of October 2007.

I am an incredibly happy dad. I feel so emotional that I want laugh and cry at the same time. I have never felt like this before in my whole life. I feel blessed and grateful. I feel like sharing my gratitude with everyone but especially with you Dr Irina, as you gave us the hint on how to conceive and avoid a miscarriage again. This simple strategy worked well for us.

So, thank you very much and God bless for the rest of your life.
Dale Yardney, NY, US

If you still feel unsure about what I have told you then don't. You will have 56 days to use the books, read them all, think about it, and apply it to yourself. And if you still think that the books are not for you, we are happy to refund the money you spent on the books as soon as possible.

But, I personally can't see any reasons why you should not like the natural methodologies to becoming pregnant I describe in my books. It is much better to try different strategies in order to fall pregnant than worry sick about those harsh words "**The biological clock is ticking**". It is up to you if you believe you have a chance to fall pregnant or you still want to try.

What will you get? -

-You will get two books for the price of one plus a FREE gift:

1. "Increase Your Fertility Naturally" – will show you the incredible methodology to get pregnant naturally. It works 100% assuming you have live eggs released from your ovaries.
2. "You Can Overcome Infertility" - will show you the exact way to get pregnant for those who have serious medical problems.
3. As a FREE gift you will get a book called "Amazing Fertility Tips" (valued \$24.99)

This companion e-book of mine gives you more insight into how to fall pregnant faster and easier and shows you even more different ways to increase your chances of having your own baby.

What do you get.

- 1). **You will get** insight into studies and methods that takes you by the hand through every aspect of infertility.
- 2). **I give you** the answers to your deep heart felt questions that only a medical doctor with a holistic approach to medicine can give you and more.
- 3) **I have spent many** years of study, reading medical books, studied the latest discoveries, read countless medical journals both traditional and non-traditional and spent nine years in research regarding infertility and methodology to help you fall pregnant and you get all that experience.
- 4) **I have discovered** the secrets that made all the difference for many people and you can easily be one of the success stories too.
- 5). **You get my latest book:** "Increase Your Fertility Naturally" where I show you how to pick your ovulation day exactly without fail. This will increase your chances of becoming pregnant 10 fold, and overcoming infertility, no more hit and miss.

ALSO,

My First book "You Can Overcome Infertility" that has helped many women.

AND

As a FREE gift you will get my book called "Amazing Fertility Tips"

ALL FOR THE PRICE OF ONE BOOK: \$39.55. Instant electronic download.

Click above to order with ClickBanks safe servers

So don't delay any longer and miss your chance of getting pregnant, after all the **Biological Clock is really ticking away.**

Special Requests

I have also been asked recently about a proper (soft or hard cover) book.

Both of these books are being approved by my publisher and in the process of getting published and released. According to my publisher it may take from 8-12 months for the book to be released.

So as a bonus to you and if you prefer something **tangible** instead of the electronic download, I can offer you my three books in form of **a CD** so you can print them out yourself. Including posting and handling it will cost you only **\$39.99**.

Electronic download \$39.55

You also get a money back guarantee.

Why you may ask am I giving such a great guarantee? Well! I want everyone to benefit from my research. Sure I am a doctor but I am also a wife and a mother, I know the joy of having a baby and I want you to have the same opportunity. Only minutes from now you can be reading my amazing e-book and putting into practice what you have learned. I have seen many happy people who were without hope who are now parents and this can be you too.

If you are worried about buying over the internet then don't. Clickbank sells our products - they are a trusted online retailer specializing in digitally delivered products. Clickbank does all the transactions on their secure servers, we never see

any of your credit card details. Clickbank will also honour the 8 weeks money back guarantee.

Here's how the guarantee works. If you read my books and you're not convinced it will help you, I want you to let me know and I'll give you your money back, no questions asked. I can't be any more fair than that. That way there's no risk to you whatsoever.

PS: Plus you also get 2 emotionally uplifting video movies that will lift your spirits: you will find these links in the "You Can Overcome Infertility" book.

So, don't hesitate you risk nothing with my 56 days money back guarantee. Why not find out today how you can overcome infertility and finally fall pregnant. Have a try and if you become successful and succeed in becoming pregnant like a lot of people in my testimonials have: write me a letter and I will gladly put your inspiring story here on my webpage.

Thank you for reading my information
and I know you will get excellent results from my books.
Dr Irina Webster.
